Installation methodes overview

Undercover Mount (standard) *Patent Pending¹*

All our Wall Covering products come with pre-cut **Undercover** attachment points. Those points are distributed along the edge (10-15mm offset) and in the middle of the panel. **Undercover** mounting system allows for concealed mechanical attachment of the panel to the mounting surface. The **installation hardware** (screws, bolts) needs to be selected in accordance to the surface on which panels are applied, and are **not included**.

1 Locate the Undercover cuts on the panel

2 Pull out the edge

3 Install hardware

4 Close

For full installation manual check our [product page](#).

Alternative methods

We offer **Spray Glue** as an alternative. For an advice on appropriate mounting method for your needs, please contact one of our Project Consultants.

Please note, that selected hardware for alternative installation methods is not included in a default delivery scope and needs to be accounted for separately.
